DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-49, drawn to market analysis of order placement (i.e. analysis of orders to determine whether buyer meets a profile or various criteria), classified in class 705, subclass 10.
 - II. Claims 50-61, drawn to providing discounts to qualifying individuals, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as profiling customers to determine whether the buyer would be interested purchasing in related pharmaceuticals or other medical products based upon order placement patterns (i.e. targeted marketing). See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
